Aim

To examine the trend in age-sex standardised Coronary Heart Disease hospitalisation rates in Scotland between 2016/17–2018/19 and 2021/22–2023/24 according to the rolling averages

Research Question

“How have age-sex standardised CHD hospitalisation rates in Scotland changed between 2016/17–2018/19 and 2021/22–2023/24 according to the 3-year rolling averages”

Read in data

The dataset used for the study is the coronary heart disease (CHD) patient hospitalisations, in Scotland, for the years 2006-2022, from the Scottish Public Health Observatory Online profiles Tool.

Numerator= Number of patients admitted due to coronary heart disease each year

Denominator = Total population each year.

Measure = Rate of admissions per 100,000 persons in the population.

```

CHD_total <- read_csv("ScotPHO_CHD_total.csv")

```

```

## Rows: 20 Columns: 12
## -- Column specification -----
## Delimiter: ","
## chr (7): area_code, area_type, area_name, period, type_definition, indicator...
## dbl (5): year, numerator, measure, upper_confidence_interval, lower_confiden...
##
## i Use 'spec()' to retrieve the full column specification for this data.
## i Specify the column types or set 'show_col_types = FALSE' to quiet this message.

Plot line graph

Plotting a line graph to show the trend line of the change in hospitalisation rates over the years.

```
ggplot(CHD_tidy, aes(x = year, y = HospRate_100k)) +
  labs(title = "CHD Hospitalisation Rate in Scotland (2017-2022)",
       x = "Year (3 year rolling average)",
       y = "Rate per 100,000") +
  geom_line() +
  coord_cartesian(ylim = c(310, 380))
```

CHD Hospitalisation Rate in Scotland (2017–2022)

```
data_frame()
```

```
## Warning: `data_frame()`' was deprecated in tibble 1.1.0.  
## i Please use `tibble()`' instead.  
## This warning is displayed once every 8 hours.  
## Call `lifecycle::last_lifecycle_warnings()`' to see where this warning was  
## generated.
```

```
## # A tibble: 0 x 0
```

Plot a bar graph

```
ggplot(CHD_tidy, aes(x= str_wrap(period, 10), y= HospRate_100k)) + geom_col(fill = "blue4") + labs(title =  
  x = "Year (3 year rolling average)",  
  y = "Rate per 100,000") + theme_classic() +  
  coord_cartesian(ylim = c(310, 380))
```
